Rapporto del Gruppo CovidStat-INFN

Data di creazione del documento: 31/3/2023 22:4:31

Introduzione

Questo documento raccoglie in modo completo i risultati dell'analisi dei dati forniti quotidianamente dalla Protezione Civile sull'andamento della pandemia di covid-19.

Si tratta di un progetto realizzato dal Gruppo di Lavoro CovidStat INFN, la cui costituzione e' stata promossa in seno all'Istituto Nazionale di Fisica Nucleare con l'obiettivo di mettere a disposizione dell'Unita' di Crisi Covid19 interna all'INFN una analisi statistica dei dati forniti quotidianamente dalla Protezione Civile sulla diffusione della pandemia in Italia. Tuttavia, si e' ritenuto che gli strumenti sviluppati per questa analisi statistica possano essere di utilita' anche per altre comunita' scientifiche e, piu' in generale, possano essere di interesse pubblico.

Questo sommario consiste, per ora, essenzialmente di figure, la cui metodologia di lettura descritta nel documento accessibile dal sito <http://covid19.infn.it> tramite il menu **Tutorial** →

Approfondimenti.pdf.

Criteri di scelta dei plot

La scelta di pubblicare un sommario implica un criterio di selezione che, nel in questo caso consiste in TUTTI i plot disponibili sul sito.

Questo documento verra' aggiornato quotidianamente, assieme al sito, e fornito in seguito anche di schede su come leggere e interpretare in modo corretto i grafici qui contenuti.
